The following is an **Examiner's Statement of Reasons for Allowance**:

Claims 24-37 are directed to isolated nucleic acid molecules comprising a nucleotide sequence (both mRNA and cDNA) encoding either a specific amino acid sequence having human serine/threonine kinase activity, or homologs of said kinase having at least 95% identity to said kinase with said activity, nucleic acid molecules encoding said kinase consisting of said mRNA and said cDNA sequences, vectors and host cells comprising all said molecules and methods of expressing said molecules.

Claimed nucleotide sequences are free of prior art. Further the prior art does not teach or suggest preparing such specifically claimed nucleotide sequences. Hence said sequences are also non-obvious. Since claimed nucleotide sequences are both novel and non-obvious, molecules consisting or comprising said sequences or consisting of or comprising specifically claimed homologs thereof with kinase activity, vectors and host cells comprising all said molecules and methods of expressing said molecules are also novel and non-obvious.

Claims 24-37 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
